Installation

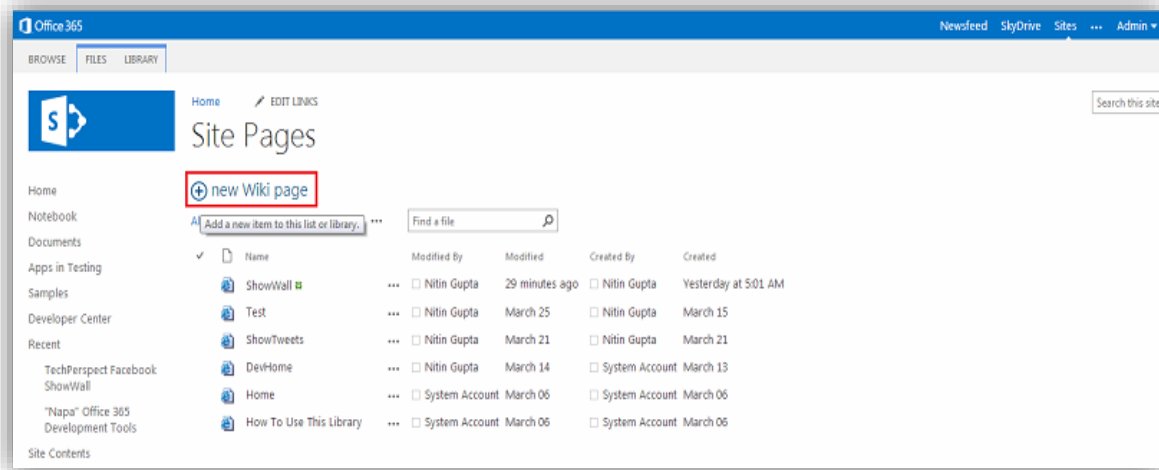

Step 1: Create Page

- Create a Wiki/Web part page in your SharePoint site. To create a new page, Navigate to Site Contents -> Site Pages link to create a new page in which the App Part would be added

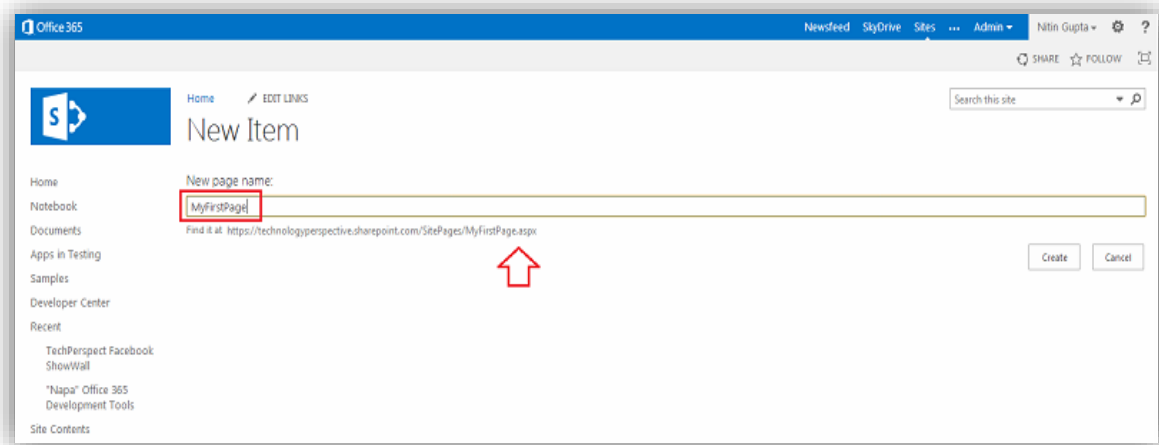

CalculateBMI Installation

- Click on the Link “New Wiki Page” to add a new wiki page in your SharePoint site.

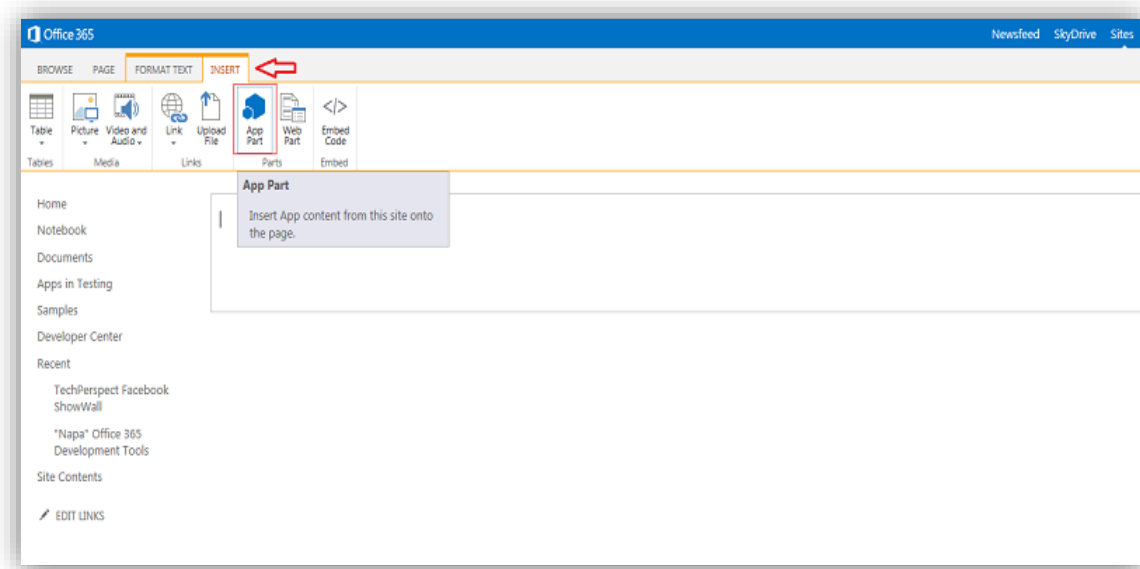

- Give a name to your page and click “Create” to create a new page.

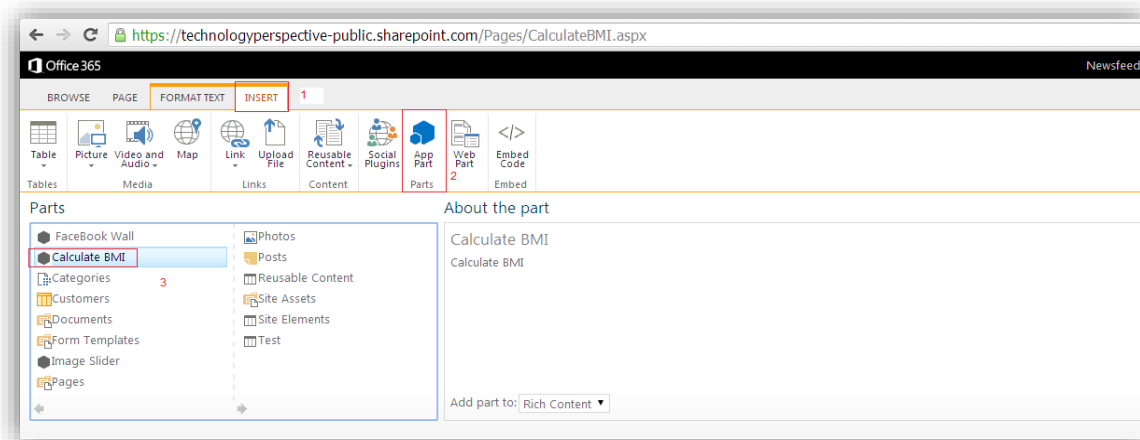

- As soon as the page is created, you will be navigated automatically to the newly created page.

Step 3: Add App Part

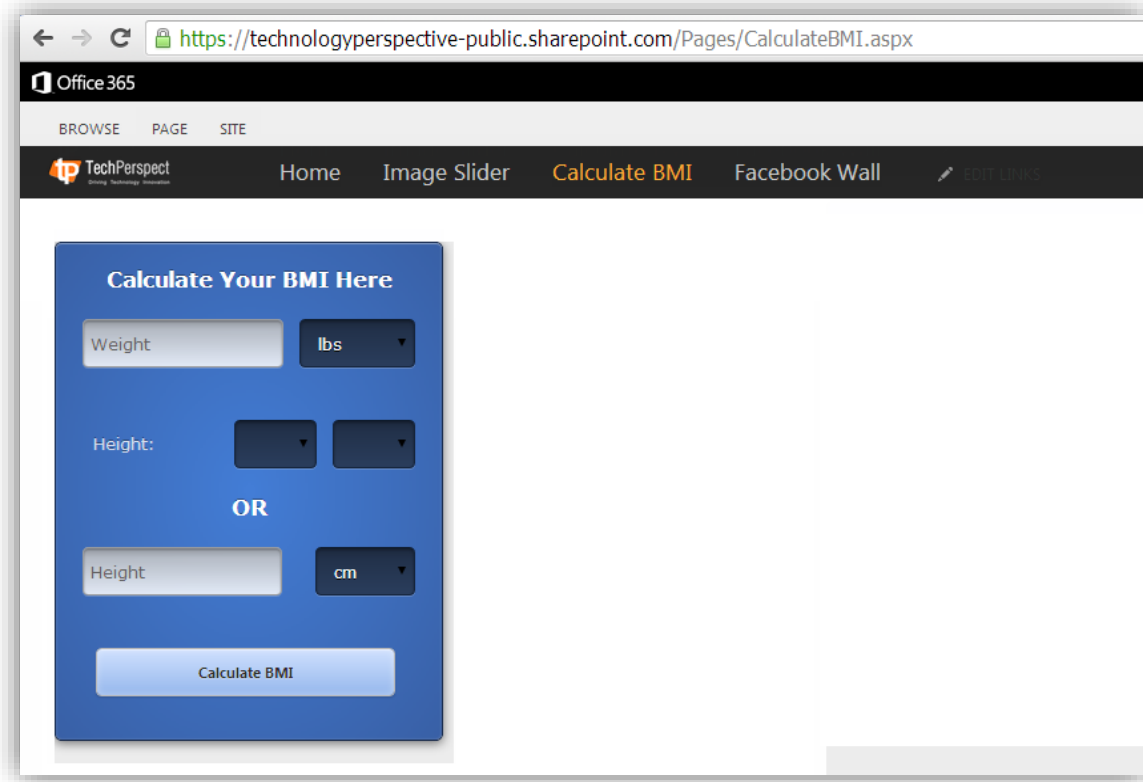

- Open the “Insert” Tab and click on the image titled as “App Part”.

- Once clicked, you will see list of the App parts deployed in your site. Select the desired app part and click “Add”.

- After the App Part is added, Save the page, you will see the app part rendered in your page.
