

Alumni Portal

Project:

Alumni Portal

Business Industry:

Education

Duration:

4 man months

Technology:

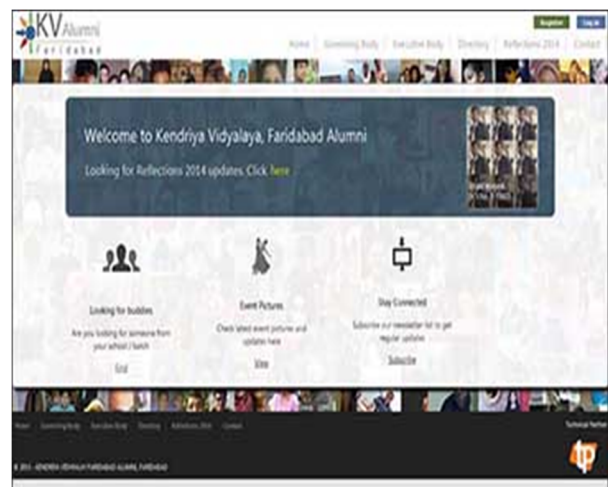

ASP.NET MVC 3.0

Problem Background

The client organization was looking for a technical partner to implement a solution for managing the alumni activities efficiently and effectively through a web platform. The alumni members wanted a web platform through which they could interact, remain abreast of the latest events, collaborate on various initiatives and engage interactively to ensure close contact with each other thus helping in building a strong alumni network across different batches. The client wanted automation of system administration, membership registration, and other processes to be facilitated end to end through the solution itself.

TechPerspect's Solution

TechPerspect provided an MVC based solution that was backed up with a powerful database backbone. The solution provided many innovative features like buddy connect which would help the alumni members to connect with each other through many different ways. It was tightly integrated with social platforms like Facebook and Twitter and had a single sign on capability integrated with Google, Facebook and LinkedIn.

Solution Features

- Social Integration
- Events Management
- Buddy Connect
- Effective Community Communication
- Collaboration Features
- Automated members registrations
- Directory search

Business Impact

- Strong alumni network
- Effective Events Management
- Efficient Collaboration Platform

Client Speaks

"The site is an effective solution for the alumni communication, content sharing and events management. It connects all the registered members through a social channel effectively."
